

Envirosite TSCA Database FOIA (EPA-2023-003315) Data Access Options

On March 28, 2023, Envirosearch Corporation's Samantha Sederquest submitted the following FOIA request to EPA:

- I am seeking a list and details of all sites in the Toxic Substances Control Act database. I am seeking details such as Site Name, Site Address, EPA ID, Number of Toxic Substance Control Act Chemicals, Latitude, and Longitude. If possible, can I please receive this in electronic format?

On March 31, 2023, EPA's Office of Chemical Safety and Pollution Prevention (OCSPP) let the requester know that the Envirofacts website that the requester visited does not provide data on a national scale, but that all of the requested TSCA data is provided by the EPA / OCSPP / Office of Pollution Prevention and Toxics (OPPT) program office. The requester could conduct the following steps to secure the OPPT Chemical Data Reporting (CDR) data that they seek:

- Visit EPA's [Access CDR Data](#) webpage to download the data.
- Select the "2020 Access data file (zip)" to access the latest reported CDR data.
- Within the resulting MS Access database, select the "Manufacture-Import Information" table to sort the desired data fields.

As an alternative data access option that would be more cumbersome but also more straightforward in terms of not requiring advanced sorting/aggregation data proficiency, the requester could run the Envirofacts query per state and then combine all of the states' information into one table.
